

CASE STUDY

Clongowes Wood College SJ

Country: Ireland
Architect: Murray O'Laoire Architects
Main Contractor: Bam Contractors Limited

Clongowes Wood College SJ

KCC supplied and installed a range of Schuco Jansen Thermally broken steel tilt & turn windows, steel doors and GEZE window actuators.

Some elements were outside normal recommended build sizes and a bespoke laser welded reinforcement profile was introduced to the system to achieve window sizes of 2485mm x 2485mm. Special Acoustic Glass was utilised to achieve a 40dB sound attenuation on some elements. Internally, KCC supplied and installed steel personnel doors with wraparound steel frames in 250mm deep concrete walls together with KCC ironmongery and access control systems.
